

[Rugged summits typical of the northern part of the Yellowstone to Yukon region.]

table of contents

sections

Purpose of this Atlas	5
Introduction to the Peel River Watershed	6
First Nations Traditional Territories	
The Variety of Life	
Special Features	
Wildlife, Wilderness and the Economy	
CPAWS Research and Community Trips	
Three Rivers Journey (2003)	8
Land Use Planning in the Peel River Watershed	9
Potential Threats to the Ecological Integrity of the Watershed	10
Oil and Gas Development	
New Industrial Development Proposals	
Land Use + Conservation Planning	
A Conservation Vision for the Peel Watershed	11
Atlas	12 - 96
Your Notes / Comments	100
Appendix A: Base Map	101
Bibliography	102

atlas

1: Topography	12
2: Physiographic Regions	14
3: Watershed Boundaries	16
4: Surficial Materials	20
5: Bedrock Geology	22
6: Enduring Features	24
7: Soil Landscapes and the Extent of Glaciation	28
8: Ecoregions	32
9: Ecosystem Classification	36
10: Forest Cover from Aerial Photography	40
11: Vegetation Cover from Satellite Imagery	42
12: Fire History	44
13: Forest Cover and Fire History	46
14: Porcupine Caribou Herd	48
15: Critical Areas Used by Woodland Caribou	52
16: Critical Areas Used by Thinhorn Sheep	54
17: Important Wetlands and Waterfowl Migration Routes	56
18: Important Nesting Habitat for Birds of Prey	60
19: Fish Species Sampled	64
20: Critical Areas Used by Selected Wildlife	66
21: Traditional Territories and Settlement Lands	68
22: Historical Sites and Travel Routes	72
23: Registered Trapping Concessions	76
24: Outfitting Concessions	78
25: Recreation/Tourism Features and Activities	80
26: Mining Claims and Coal Licences	84
27: Oil and Gas Exploration and Development	86
28: Sequence of Industrial Development	90
29: Areas Previously Identified for Wildlife Conservation	94
30: Important Natural and Cultural Areas Identified by Previous Land Use Planning Processes	96
